

12.0.10 - Revision - 08/04/2023

Added **FOCUS-39227 - Communication Platform: Add Support for Communication Queue in Report**

This branch introduces essential improvements to the Communication Report, enabling it to reference the new Communication Queue introduced in revision 12.0.10. With these enhancements, the Communication Report will be able to effectively retrieve and present data from the updated Communication Queue.

Added **FOCUS-39241 - V12 Communication - Reply not received**

Added **FOCUS-39254 - Communication Platform: Resolve Display of Historical Messages**

This branch addresses an issue where previous messages were not displaying to end-users in the Communication Platform Inbox after updating to version 12.0.10. With this correction, end-users will now be able to see their previous messages in the Communication Platform Inbox as expected.

Added **FOCUS-39301 - Communication Platform: Ensure Communication Emails Scheduled Job Processes all Applicable Replies**

This branch ensures that the Communication Emails built-in Scheduled Job processes all applicable messaging replies generated by email to the Inbox in the Communication Platform. With this improvement, the Scheduled Job will effectively handle and process all incoming email replies related to messaging within the Communication Platform, ensuring that users receive and can respond to messages seamlessly.

Added **FOCUS-39313 - Communication Queue - Run as a single process for MT**

Added **FOCUS-39328 - Communication - Re-add recipients.language_id**

Added **FOCUS-39303 - Communication: Error When Viewing Scheduled Messages**
